- 1. The data used in calculating rate base are averages.
- 2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
- 3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

2000 Analytical Review DWCCA-880-PJL

Dear Mr. Payne:

The Public Service Commission has completed their analytical review of your 2000 annual report. The primary purpose of our analytical review is to detect possible accounting related errors and to identify significant fluctuations from prior year's data, which are not sufficiently explained in the footnotes of your annual report. We have no questions only the following comment.

- 1. In the future, please provide the point of delivery of the purchased water, line 28 of the Source Of Supply, Pumping And Purchased Water Statistics schedule on page W-10.
- 2. Please note in the future that if new rates take effect during the year, the Public Fire Protection amount billed on page W-4 should be prorated based on the number of days that each rate is in effect.

Thank you for your efforts in preparing your 2000 annual report. We are closing the review of your 2000 annual report. If you have any questions, please feel free to contact me at (608) 267-9198 or by e-mail at leegep@psc.state.wi.us.

Sincerely,

Peter J. Leege Financial Specialist Division of Water, Compliance, and Consumer Affairs
